# K2 SERVICES

# TRUST YOUR CRITICAL SYSTEMS TO OUR SECURE, RELIABLE TECHNICAL HOSTING AND PLATFORMS

K2 Services provides specialized hosting solutions tailored for law firms and professional services. Our technical experts manage and support your critical systems infrastructure, applications and data – in our secure facilities or through private/public cloud platforms.

## *We have a hosted service that's right for you.*

No one firm is exactly like another in terms of its hosting requirements.
That's why K2 offers three core hosted service types tailored to fit your firm's specific needs.

## Data Center Co-Location Services

Our Data Center Co-Location hosting services provide secure physical data center space for your servers and equipment. We manage dedicated spaces within our strategic partner's top-tier facilities around the world and work directly with our clients to size an offering that will meet their current and future needs. This saves you from having to negotiate and manage relationships directly with data center vendors and the expense of maintaining or upgrading your own server room. K2 Services offers physical space, power, cooling, bandwidth and industry-standard security. We assist with initial facility design and setup as well as ongoing smart-hands support. Data Center Co-Location hosting simplifies your data center needs with an experienced partner handling management of the site and compliance requirements.

## Cloud Data Center Infrastructure Hosting

We offer secure hosting on a cloud infrastructure platform. Our skilled team helps plan and execute migrations to the cloud while optimizing performance, security and costs. We provide managed services around cloud infrastructure, networking, storage, backup/recovery and more. Whether you are transitioning fully to the cloud or taking a hybrid approach, we make cloud hosting smooth and worry-free. Our cloud infrastructure expertise allows clients to focus on core legal work rather than cloud management.

## Managed WAN Services

Our managed WAN solutions connect multiple firm locations into a secure, diverse and high-performance enterprise network. We design, implement, monitor and proactively support advanced WAN architecture using leading technologies like SD-WAN. This simplifies branch office connections while providing optimized access to applications and workloads across the network and in the cloud. We tailor robust, scalable networks aligned to your specific needs.

## It's not just outsourcing when you work with K2 Services

### Access to Enterprise-Grade Infrastructure
We leverage top-tier data centers and cloud platforms that would be costly for most firms to build themselves. This provides enterprise-level redundancy, security, scale and performance.

### Increased Reliability and Uptime
Our 24/7 monitoring, support, maintenance and disaster recovery capabilities reduce the risk of downtime events that disrupt work. We keep systems optimized for maximum availability.

### Enhanced Security and Compliance
Our hosting environments adhere to strict security controls and industry compliance standards like ISO 27001 and SOC II. This helps mitigate cyberthreats and breach risks, while allowing your firm to maintain good standing with partners that require robust control of data.

### Improved Efficiency
Our technical experts handle all aspects of hosting, including maintenance, troubleshooting, upgrades and system enhancements. This frees up internal resources.

### Focus on Core Legal Work
Outsourcing hosting allows IT and firm staff to transition focus to differentiated and revenue-generating activities.

### Scalability and Agility
We make it easy to scale hosting capabilities up or down as needs change. Firms gain more flexibility and agility.

### Access to Expertise
Our seasoned engineers offer deep technical knowledge around security, compliance, disaster recovery and optimization best practices.

Outsourcing technical hosting and platforms to K2 Services provides enterprise-class capabilities, reliability and expertise while reducing costs and headaches, allowing your team to focus on serving clients and growing the business.

### Our Commitment
We are dedicated to empowering legal firms with modernized technology platforms and elevated operational support, ensuring seamless transitions to managed services and maintaining a high standard of security. Our industry expertise, coupled with a user-centric approach, positions us as a leader in legal technology services to allow you to excel in what you do best.

### A Client-Centric Approach
Partner with K2 Services for comprehensive, customized IT services. Our broad expertise and extensive partner network enable us to craft solutions specifically tailored to your firm's unique needs and goals.

At K2 Services, our dedicated experts possess unmatched knowledge of the legal industry, technology platforms and enterprise applications. We work seamlessly as an extension of your team, empowering your professionals to focus on delivering exceptional client service and supporting your firm's strategic initiatives. Your satisfaction and partnership experience are our utmost priority, guiding every solution we provide.

Let K2's expert services, valuable insights and standards-based operational practices power your mission-critical technology systems. Our expertise in modern infrastructure, security and cloud platforms ensures your firm confidently leverages the latest technological advancements primed to scale and meet your needs.
